## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagano '981. Nagano '981 (particularly figure 5) discloses a lighting fixture 24 comprising a fixture electrical contact 22. A mounting member 50 supporting the lighting fixture 24 and a cable 40, wherein said cable comprises a cable electrical contact 110. The cable 40 is fitted between the mounting member 50 and the lighting fixture 24 such that said fixture electrical contact 22 is held in frictional contact with said cable electrical contact 110 (see figure 5 and columns 7-8).

Regarding claim 2, the mounting member 50 comprises an elongated rail.

Regarding claim 5, the light device is inherently attached to a power source.

Regarding claim 6, the light device includes a plurality of light modules.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 2875

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nagano in view of Tribelsky et. Nagano discloses the claimed invention except for the teaching of a processor for controlling a network of lights. Tribelsky et al teaches a processor for controlling a network of lights. It would have been obvious to one skilled in the art to include a processor with the lights of Nagano in order to efficiently control the lights in various applications

***Allowable Subject Matter***

Claims 15-20 are allowable.

Claims 3-4 and 7-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Reasons for allowance, none of the prior art of record alone or in combination teaches or fairly suggest applicant's claimed invention. Particularly, the details of claim 1 further including the limitation of claim 3, the limitations of claims 5-7, the limitations of claim 8, or the limitations of claim 9. Furthermore, regarding claim 15, none of the prior art of record alone or in combination teaches all the claimed elements further including "a flat cable" which is not a mere design choice but is important structure for lighting device to function properly.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Boss discloses a lighting strip similar to applicant's invention.
